KITCHENS & EXTENSIONS

MAXIMISE SPACE AND IMPACT

WE OFFER TWO SERVICES

Kitchen in an Existing Space

We have been making award winning kitchens for over 15 years.

We do not churn out generic designs. Instead we will work with you to create a kitchen that is everything you had hoped for and more.

If you have not already appointed a builder, then our in-house building team can take care of the plumbing, electrics, flooring, decoration, and whatever else is required to complete your project.

Kitchen Remodelling and Extensions

Sometimes, achieving your dream kitchen will involve significant internal renovations or adding an extension. Our in-house designers, builders and project managers provide a seamless service from start to finish.

From obtaining planning permission until the finishing coat of paint, we'll take care of the designs, the building work, the kitchen installation, and the paperwork.

Your project will be completed on time, on budget and to a high quality of finish.

Whether it's a kitchen or an extension we apply the same high standards of design supported by 3D visuals of our proposals. Because we are responsible for the whole project we are able to provide accurate budgets and realistic time schedules from the outset.

OUR KITCHENS

ENGLISH CRAFTSMANSHIP, MODERN TECHNOLOGY

Our kitchens are made to order at our workshop in Shrewsbury.

Our cabinet makers are skilled and experienced furniture makers, able to cope with often complex, challenging and unique designs.

We are not limited to standard cabinet sizes and formats, so our kitchens can make best use of the space available.

We use high quality materials, precision tooling, and the most reliable mechanisms on the market, to ensure our kitchens out-perform the competition.
